CA4N

Professional Power Amplifier

DESCRIPTION

CA series is the amplifier with big power and excellent performance. It can meet different audio avenues.

FEATURES

- Big power, dynamic energy;
- Innovative heat sink structure and high quality heat sink fan assure reliable working for a long time;
- Loading impedance temperature-power-running voltage" can be controlled alternately, Speed of Fan is automatic adjusted by temperature. When load is too low or temperature is too high, the equipment can adjust the power supply and lower impedance of power, which improves sound quality and protect the equipment better. The reliability will be improved remarkably;
- Low distortion;
- High slew speed, outstanding sound quality and high transparent;
- Low noise:S/N>108dB(A Weight);
- 20Hz~20KHz <+0/-0.25 dB;wide frequency band;
- Small dimension, 2U rack mounting.
- CA4N is specially designed for low loading imedance, and can work for a long time under 2Ω .

TECHNICAL SPECIFICATIONS

Rated Power (Stereo 8Ω)	2 x 660W
Rated Power (Stereo 4Ω)	2 x 1000W
Rated Power (Parallel mono 8Ω)	2 x 660W
Rated Power (Parallel mono 4Ω)	2 x 1000W
Rated Power (Bridged-mono 16Ω)	1330W
Rated Power (Bridged-mono 8Ω)	2000W
Frequency Response	20Hz~20kHz(+0/-0.25dB)
SNR	>108dB(A-Weight)
THD	<0.05%(10%Rated power[]
IMD	<0.1%(60Hz/7kHz,10%Rated power[]
Phase difference	<±15°
Damping Factor	>800(8Ω/100Hz)
Segregation	>75dB
Total gain	39±0.5dB
Difference of Channel gain	<0.25dB
Input sensitivity	1V
Slew Rate	>100V/µs
Siew Nate	. 100 γ/μο
Input impedance	Unbalanced input $10 k\Omega$,Balanced input $20 k\Omega$
Input impedance	Unbalanced input $10 k\Omega$,Balanced input $20 k\Omega$
Input impedance Input connectors	Unbalanced input $10k\Omega$,Balanced input $20k\Omega$ Three pin XLR/6.35mm
Input impedance Input connectors Output connectors	Unbalanced input $10 k\Omega$, Balanced input $20 k\Omega$ Three pin XLR/6.35mm Speakon binding post, NL4 speakon
Input impedance Input connectors Output connectors Cooling	Unbalanced input $10k\Omega$, Balanced input $20k\Omega$ Three pin XLR/6.35mm Speakon binding post, NL4 speakon Four fans[stepless shifting, Cooling airflow from front to back
Input impedance Input connectors Output connectors Cooling Controls on front panel	Unbalanced input $10k\Omega$, Balanced input $20k\Omega$ Three pin XLR/6.35mm Speakon binding post, NL4 speakon Four fans[]stepless shifting, Cooling airflow from front to back Switch of AC, Gain controlling knob for channel A and B
Input impedance Input connectors Output connectors Cooling Controls on front panel Controls on rear panel	Unbalanced input $10k\Omega$, Balanced input $20k\Omega$ Three pin XLR/6.35mm Speakon binding post, NL4 speakon Four fans[stepless shifting, Cooling airflow from front to back Switch of AC, Gain controlling knob for channel A and B Parallel/Stereo/Bridge, LF cutting, Grounding, Limit
Input impedance Input connectors Output connectors Cooling Controls on front panel Controls on rear panel Indicator on front panel	Unbalanced input $10k\Omega$, Balanced input $20k\Omega$ Three pin XLR/6.35mm Speakon binding post, NL4 speakon Four fans[]stepless shifting, Cooling airflow from front to back Switch of AC, Gain controlling knob for channel A and B Parallel/Stereo/Bridge, LF cutting, Grounding, Limit Yellow-Bridge, Red-Overload, Green-Signal
Input impedance Input connectors Output connectors Cooling Controls on front panel Controls on rear panel Indicator on front panel Amplifier protection	Unbalanced input 10kΩ,Balanced input 20kΩ Three pin XLR/6.35mm Speakon binding post, NL4 speakon Four fans[]stepless shifting, Cooling airflow from front to back Switch of AC,Gain controlling knob for channel A and B Parallel/Stereo/Bridge, LF cutting,Grounding,Limit Yellow-Bridge,Red-Overload,Green-Signal Short Circuit, Maladjustment of DC, Overload, Overheat ,Etc
Input impedance Input connectors Output connectors Cooling Controls on front panel Controls on rear panel Indicator on front panel Amplifier protection Power supply	Unbalanced input 10kΩ,Balanced input 20kΩ Three pin XLR/6.35mm Speakon binding post, NL4 speakon Four fans[stepless shifting, Cooling airflow from front to back Switch of AC,Gain controlling knob for channel A and B Parallel/Stereo/Bridge, LF cutting,Grounding,Limit Yellow-Bridge,Red-Overload,Green-Signal Short Circuit, Maladjustment of DC, Overload, Overheat ,Etc AC 220V-240V~, 50/60Hz (or AC 110V-120V~, 50/60Hz), 1500VA
Input impedance Input connectors Output connectors Cooling Controls on front panel Controls on rear panel Indicator on front panel Amplifier protection Power supply Environment Temperature	Unbalanced input 10kΩ,Balanced input 20kΩ Three pin XLR/6.35mm Speakon binding post, NL4 speakon Four fans[stepless shifting, Cooling airflow from front to back Switch of AC,Gain controlling knob for channel A and B Parallel/Stereo/Bridge, LF cutting,Grounding,Limit Yellow-Bridge,Red-Overload,Green-Signal Short Circuit, Maladjustment of DC, Overload, Overheat ,Etc AC 220V-240V~, 50/60Hz (or AC 110V-120V~, 50/60Hz), 1500VA Working temperature: -10[~40] Storing temperature: -25[~80]
Input impedance Input connectors Output connectors Cooling Controls on front panel Controls on rear panel Indicator on front panel Amplifier protection Power supply Environment Temperature Environment humidity	Unbalanced input 10kΩ,Balanced input 20kΩ Three pin XLR/6.35mm Speakon binding post, NL4 speakon Four fans[]stepless shifting, Cooling airflow from front to back Switch of AC,Gain controlling knob for channel A and B Parallel/Stereo/Bridge, LF cutting,Grounding,Limit Yellow-Bridge,Red-Overload,Green-Signal Short Circuit, Maladjustment of DC, Overload, Overheat ,Etc AC 220V-240V~, 50/60Hz (or AC 110V-120V~, 50/60Hz), 1500VA Working temperature: -10[~40[] Storing temperature: -25[]~80[] ≤90%
